

HOW TO MANAGE YOUR MOBILE DATA

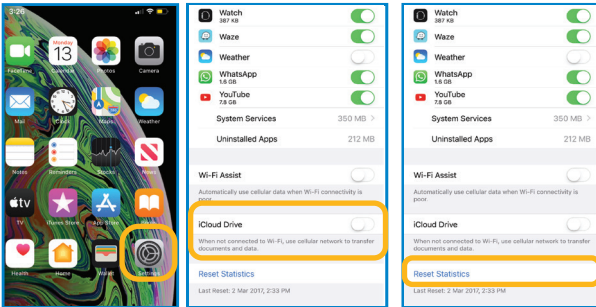

for iOS

A woman with her hair in a bun is sitting in a chair, listening to music on her phone with earbuds. She is holding a smartphone in her right hand and has her left hand raised. The background is a tropical setting with large plants and a window with sheer curtains. The overall mood is relaxed and enjoyable.

General Do's and Don'ts

Do

- Configure Data Usage limits. Use the built-in apps for android to set warnings and limits to be in line with your data plan.
- Make a note of data usage on iPhone at the beginning and end period of your billing cycle, this will help you track your usage during your cycle.
- Disable unwanted apps.
- Block apps that you do not wish to have access to cellular data.

Don't

- Don't use third-party lock screens
- Don't install applications from untrusted sources
- Don't use third party anti-virus apps
